

מבחן ניהול מאגר מוחבלים

סיפור:

1. ביחידה 8200 רצים לנחל את מאגר המוחבלים הידוע.
2. יש לבנות מערכת שטוענת את כל המוחבלים שמורים במערכת, מאפשרת חיפוש לפי המאפיינים שלהם
3. המערכת היא מערכת פרוונט עם ריאקט בלבד

Main Features

1. Load Data

- Put JSON data from the given file into an array in your react project.
 - The file contains many terrorists.
-

2. Show Terrorists

- Show each terrorist as a row in a table
 - Each row shows main details. Images should be loaded from website
 - if there is no link to a profile image - use the default image (given)
-

3. Search

User can search by:

- Name
 - Number of attacks
-

4. Filter

User can filter by status:

- Active
 - Quiet
 - Dead
 - Israeli Agent
-

5. Most Dangerous Terrorist

Find one terrorist who:

- Has dangerous status
 - Has high attack count
 - Has an image
-

Design Requirements

- Basic clean layout
 - Basic animations (hover / card appear / simple transitions)
-

Terrorist JSON Structure

Each terrorist object contains:

- Name
- Organization
- Number of Attacks
- Status (Active / Quiet / Dead / Israeli Agent)

- Short Description of Relation to Israel
 - Image Link OR Default Image
-

Bonus Feature (Optional)

When clicking a card:

- Open bottom panel

Panel allows:

Eliminate Terrorist

- Choose weapon (UI selection only)
- Change status

Recruit Terrorist

Allowed only if:

- Low attack count
- Status = Quiet
